

As of May 2004, the AB2588 staff identified 20 facilities that must reduce risks (see table below). All of the facilities have submitted risk reduction plans (RRPs) of which nineteen were subsequently approved by the staff. The RRP for Quemetco is being reviewed with approval expected in the summer of 2004. So far, sixteen of the facilities have fully implemented their RRP and most of these reduce their risks far below the action levels mandated by Rule 1402. The rest of the facilities have until the date indicated in table to implement their plans.

(a) Risk reduction plan and projected residual risks are currently under review.

(b) Facility left the South Coast Air Basin as a result of a consent decree with the City of Carson. Thus, risks are zero.

(c) Source test report supporting the acute HI estimate is under review.
